### **Osborne Canine Canteen® Waterer Awarded CSA® Certification**

Canadian dogs never need to be thirsty again. The Osborne Canine Canteen waterer provides ice-free water in winter weather and has recently gained CSA certification for its design. This CSA certification now makes this product easily available to Canadian dog owners through leading Canadian retailers. The Canine Canteen waterer has been the market leader in the USA for almost 20 years.

The Canine Canteen waterer prevents water from freezing in winter. A thermostated heater keeps water at just the right temperature for dogs, but operates for only pennies per day. The stainless steel liner with patented overturned lip resists chewing and corrosion. Foam insulation saves power and seals electrical parts away from harm. The Canine Canteen waterer fastens to fence or kennel with spring-loaded hooks provided.

Osborne Industries, Inc. is a diversified manufacturer of pet and livestock management equipment, located at 120 N. Industrial Ave., Osborne, KS, 67473.
