

## Use Stanfield® Controls For Top Performance And Economy

### Automatic Controls F920A and F920D -

The Stanfield® Models F920A and F920D Heat Pad Controls allow breeders to automatically maintain a desired temperature for a system of Stanfield Heat Pads. The high-capacity F920A and F920D controls are rated at 2,400 watts and 4,800 watts each and feature a moisture-resistant plastic enclosure that resists corrosion and provides easy cleaning. Unlike solid-state controls, which can be damaged by high-current spikes, the F920A and F920D controls utilize a sealed mechanical relay that is much more resistant to high voltage spikes. The F920A and F920D provide many years of reliable service in kennels.

### Maintain Optimum Temperature For Animals - Cost Effectively

The Stanfield F920A and F920D Heat Pad Controls reduce electric power costs while delivering optimum temperature for animal development. Heat pad temperature can be optimized as puppies grow to ensure the best and most efficient use of both power and heat pads. Energy is used only when it is needed, providing the best environment for puppies with minimum energy costs.

The 6-ft sensor allows probe to be located near the floor, away from animal contact, for accurate temperature regulation. The temperature sensor probe is encased in an epoxy-filled tube that is durable and resists disinfecting chemicals.

**Power Control F911** – Plug this versatile, economical control into any 110-120 volt outlet wherever it's needed to regulate heat pad temperatures and save electricity. With two built-in outlets and a 600-watt capacity, it can handle several pads at once.

Stanfield Heat Pad F920 and F911 Controls are also available in 220V.

**New F300 Control** – Model F300 has been recently added to our line of Stanfield Heat Pad controls, for single heat pad temperature adjustment. The F300 is a 300-watt, UL listed, plug-in control. No tools are required for installation. Its thermoplastic enclosure is rugged, heat-resistant and compactly built. The F300 Stanfield Heat Pad control features a high-to-low on-off switch.

### Set It Right, Just Point And Click.

The convenient laser-guided Pad Probe infrared thermometer gives you instant readings so you can maintain the right setting for animal comfort and development. Puppies cluster on properly regulated heat pads.

# Heat Pads

## The energy-saving heat source for healthier puppies and field dogs.

### Delivering Safe, Efficient Heating To Animals Since 1973

Osborne Industries introduced Stanfield Heat Pads to the livestock industry 30 years ago. As our engineers developed new technology and materials, we have continued to build product improvements into their design. Today our Stanfield Heat Pads and Accessories offer you unequalled savings, safety, and durability. They are the acknowledged standard of the pet industry worldwide.

### Ensure Health And Reduce Costs

Stanfield Heat Pads put heat where it is needed to improve puppies' health and reduce your costs. Stanfield Controls enhance heat pad performance and economy. You will enjoy the elimination of bedding, along with its costs, sanitation problems, and labor.

### Every Dog Deserves Stanfield® Heat Pads

Stanfield Heat Pads are the most safe, reliable, and economical heat for your kennel and your most important field animals. They provide evenly distributed heat to block the cold, keeping your dog safely and gently warm through cold winter nights. Your pet will thrive with a warm surface to lie on or against.

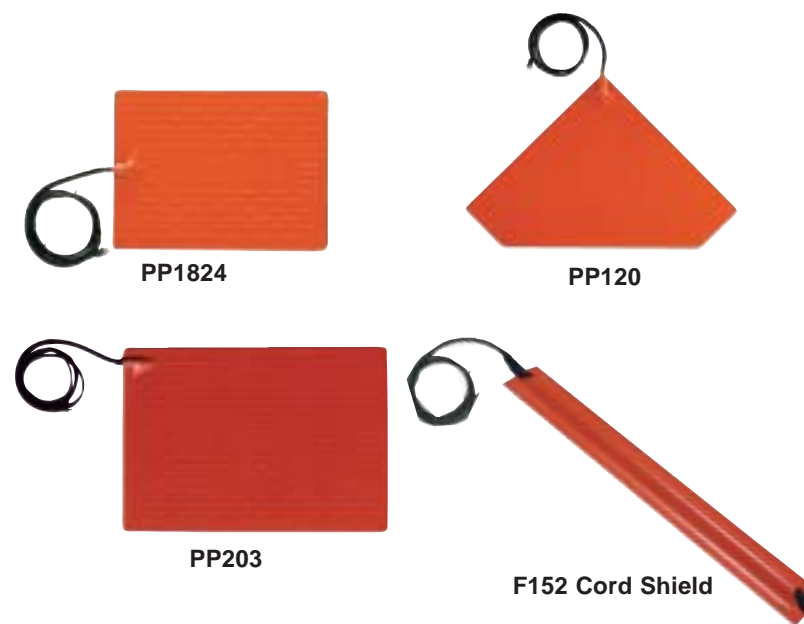

### Stanfield® Heat Pads

The safest, most efficient way to warm dogs and puppies.

### Get Osborne Quality And Safety

Today our Stanfield Heat Pads feature even safer, more durable heating elements and a stronger fiberglass-reinforced composite pad material far superior to the flammable plastics competitors use. Along with worldwide popularity, Stanfield Heat Pads have earned UL, CE, and CSA certification. To ensure unrivaled performance and your satisfaction, we manufacture them under an audited ISO 9001 quality management program and provide the best warranty in the industry.

*Achieve better survival and better health putting heat where it is needed.*

- Stanfield Heat Pads meet or exceed UL, CSA, and CE standards for safety.
- Voltages other than 120V available.
- Order Cord Shield F152 with heat pads as extra protection for power cords.

## Wean Stronger, Healthier Puppies With Stanfield® Heat Pads

Stanfield Heat Pads provide a uniformly warm surface 30-35 °F (16-20 °C) above air temperature. This creates a 90-100 °F (32-38 °C) resting surface in a 60-70 °F (15-21 °C) building that is just right for your puppies, which seek the warmth. The rigid, nonporous surface makes them highly hygienic and easy to clean.

- Reduce room temperature without stressing puppies.
- Keep bitches cooler, more productive.
- Promote healthful rest.
- Build disease resistance.

### Heat Pad Selection Guide

Model Number	Size		Power Output Watts @ 120V
	Feet	Meters	
PP1B3	1.0x3.0	0.30x0.91	80
PP1B4	1.0x4.0	0.30x1.22	100
PP1B5	1.0x5.0	0.30x1.52	140
PP1824	1.5x2.0	0.46x0.61	95
PP120	2.3x2.3x3.5	0.70x0.70x1.07	90
PP203	1.96x2.8	0.60x0.85	125
PP303	3.0x3.0	0.91x0.91	200
PP304	3.0x4.0	0.91x1.22	260
PP306	3.0x6.0	0.91x1.83	400
