NEWS RELEASE

New Agri-Aide® Ventilation Engineering CD Released

Kennel owners and pet retailers are an under-served market for engineered ventilation systems, according to Amy Conrad, Ventilation Product Manager for Osborne Industries, Inc., Osborne, KS. The company is now offering a free Agri-Aide® Ventilation Engineering CD to help its customers in this market with innovative ventilation solutions for pet management, according to Dr. Ron Thibault, Vice-President of Engineering.

The Osborne Engineering CD assists with the engineered design and layout of ventilation systems. Contained on the CD are product pictures, specifications, and airflow performance curves. Conrad notes that a review of the technical information on the CD can help customers better understand how their ventilation system works.

manufactured Agri-Aide® Ventilation systems for over 25 years and offers extensive engineering expertise in the design of ventilation for animal facilities.

Osborne Industries, Inc., Osborne, KS, has

Gordon Loots, Osborne *Ventilation Systems Consultant*, says “Most of our customers are noticing a drastic decrease in Upper Respiratory Infections after installing a carefully engineered Agri-Aide ventilation system.” Loots notes that maintaining healthier animals means fewer pups are being rejected by brokers or customers, yielding more profit for properly ventilated kennel facilities. According to Loots, hundreds of Agri-Aide users are already seeing the benefits of healthier animals.

Conrad says “The company provides an experienced systems consultant by request if after a preliminary discussion by telephone suggests the need for an on-site inspection. Our consultant carefully inspects each kennel or pet store layout for a small engineering fee to cover expenses. A customized ventilation system is then designed to meet the particular needs for each facility.”

According to Conrad, an Agri-Aide design delivers top-performing results because Agri-Aide equipment gives the ventilation engineer a wide array of equipment options and the flexibility to create the best solution for each unique facility. The company strives to ensure that each equipment component is a quality leader in its class and will give its user years of trouble-free service, says Conrad, and the new Ventilation CD is just part of this service.

Osborne Industries, Inc., is a diversified manufacturer and distributor of livestock and pet management equipment, located at 120 Industrial Avenue, Osborne, Kansas, 67473.

To obtain a copy of the Agri-Aide Engineering CD or for more information about Agri-Aide Ventilation Systems for kennels and pet stores, call Osborne Customer Service at 1-800-255-0316 or send e-mail to info@osborne-ind.com. Information is also available on the Osborne website: <http://www.osborne-ind.com/petsub/vent/ventilation1.htm>
